THE STANVAC ELECTRICAL ADVANTAGE

34 MAINTENANCE PROBLEMS INDIA-sIzes BEST SOLUTIONS-GOOD.

എന്തിന് വാങ്ങണം?

TECHNOLOGY-യിലെ വ്യത്യാസം. നിങ്ങളുടെ പ്രയത്നം കുറയും.

SAP - Earth is love in water numbering. Material testing, wiring, corrosion, agricultural transportation and fuel. Heavy-duty, engineering, and fabrication. Safety electricity.

01 PASSIVE FIRE PROTECTION

STANVAC FS12 - Thermal, Calcium, Expansion.

Fire-resistant coating applied to steel surfaces to delay heat transfer during a fire. Intumescent coating expands when heated, forming an insulating char layer. Cementitious coating is sprayed on in thicker layers. Fire rating is measured in hours (e.g., 60 minutes, 120 minutes).

02 FIRES FAS 12 - Fire Sealant

Fire sealant used to prevent the spread of fire and smoke through gaps and openings in walls, floors, and ceilings. Intumescent sealant expands when heated, blocking the passage of fire. Acoustic sealant reduces noise transmission between rooms. Fire-rated sealants are tested and certified to specific fire resistance ratings.

03 FIRES AS 45 - Circuit Survival

Cable designed to maintain circuit integrity during a fire, ensuring that critical systems remain operational for a specified period. Mineral insulated cable is highly resistant to fire and heat. Fire-resistant cable has a special coating that prevents the spread of flames. Cables are tested to withstand fire for a certain duration.

04 FIRES FC 1 - Flame Propagation Protection

Coating applied to surfaces to slow down the spread of flames. Intumescent coating expands when heated, forming an insulating char layer. Cementitious coating is sprayed on in thicker layers. Flame spread index is measured according to standardized tests.

05 FIRES FCS - Fire Control Switch

Switch that controls the flow of fuel to a fire, allowing it to be shut off in an emergency. Manual fire control switch is operated by a person. Automatic fire control switch is triggered by a fire detection system. Fire control switches are typically red and clearly labeled.

06 FIRES FH - Fire Hose Reel

Hose reel mounted on a wall or cabinet, containing a fire hose for manual firefighting. Hose reel is connected to a water supply. Hose is typically 30 meters long. Hose reel is designed for easy deployment by a single person.

07 FIRES FM 11 - Fire Stop Mortar

Mortar used to fill gaps and openings in fire-rated walls and floors. Intumescent mortar expands when heated, blocking the passage of fire. Cementitious mortar is applied in layers. Fire-rated mortars are tested and certified.

08 FIRES FR 150 - Mineral Wool Fire Barrier

Fire barrier made of mineral wool insulation, used to prevent the spread of fire and smoke. Mineral wool is non-combustible and has a high melting point. Fire barrier is installed in walls, floors, and ceilings. Mineral wool barriers are tested and certified.

09 FIRES FS - Fire Stopping Foam

Foam used to seal gaps and openings around pipes, cables, and other penetrations in fire-rated walls and floors. Intumescent foam expands when heated, blocking the passage of fire. Foam is applied in liquid form and cures in place. Fire-stopping foam is tested and certified.

11 CLEANING, INSULATION & PROTECTION

07 ERES Easy Clean 10L 3M0 SHP BP

Cleaning solution for electronic equipment, such as computers and circuit boards. Non-flammable, leaves no residue, and is safe for use on plastics and metals. Available in aerosol cans or bulk containers. Compatible with most electronic components.

08 ERES Electronic Component Cleaner 10L 3M0 SHP

Specifically designed for cleaning electronic components, such as circuit boards and connectors. Non-conductive and non-corrosive, safe for use on sensitive electronics. Available in aerosol cans or bulk containers. Compatible with most electronic components.

09 ERES Battery Terminal Corrosion Cleaner 10L 3M0 SHP

Cleaning solution for battery terminals, such as those found in cars and trucks. Removes corrosion and dirt, and helps to prevent future corrosion. Available in aerosol cans or bulk containers. Compatible with most battery types.

10 ERES Battery Acid Neutralizer 10L 3M0 SHP

Neutralizing agent for battery acid, such as that found in car batteries. Helps to prevent corrosion and damage to surrounding surfaces. Available in aerosol cans or bulk containers. Compatible with most battery types.

11 ERES Carbon Cleaner

Cleaning solution for carbon deposits, such as those found in engines and exhaust systems. Removes carbon buildup and helps to improve performance. Available in aerosol cans or bulk containers. Compatible with most engine types.

12 ERES Heat Insulating Varnish 3HP - Class F

Varnish used to insulate electrical components, such as coils and transformers. Provides a high level of heat resistance and electrical insulation. Available in aerosol cans or bulk containers. Compatible with most electrical components.

13 ERES Lacquer 10L 3M0 SHP

Lacquer used to protect and insulate electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

14 ERES Plasticoat Clear 10L 3M0 SHP

Clear plastic coating used to protect and insulate electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

15 ERES Polyurethane Varnish 10L 3M0 SHP

Varnish used to insulate and protect electrical components, such as coils and transformers. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

16 ERES Silicone Scrapper SHP

Silicone-based scraper used to remove adhesives, sealants, and other materials from surfaces. Non-abrasive and safe for use on delicate surfaces. Available in various sizes and shapes. Compatible with most surfaces.

17 ERES Easy Kote SHP

Protective coating applied to electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

18 ERES Battery Terminal Coating

Coating applied to battery terminals to prevent corrosion and improve electrical conductivity. Helps to maintain a strong and reliable connection between the battery and the vehicle's electrical system. Available in aerosol cans or bulk containers. Compatible with most battery types.

19 ERES Fabcel 10 C

Cleaning solution for fabric and textile surfaces, such as those found in clothing and upholstery. Removes dirt, stains, and odors, and helps to restore the appearance of the fabric. Available in aerosol cans or bulk containers. Compatible with most fabric types.

20 ERES Fabcel 10 C

Cleaning solution for fabric and textile surfaces, such as those found in clothing and upholstery. Removes dirt, stains, and odors, and helps to restore the appearance of the fabric. Available in aerosol cans or bulk containers. Compatible with most fabric types.

21 ERES Transformer Oil Leakage Repair Kit

Kit for repairing leaks in transformer oil tanks and other equipment. Includes sealant, adhesive, and other materials needed for the repair. Easy to use and provides a long-lasting repair. Compatible with most transformer oil types.

22 ERES Antifreeze

Antifreeze solution for electronic equipment, such as computers and circuit boards. Prevents damage from freezing temperatures and helps to maintain optimal performance. Available in aerosol cans or bulk containers. Compatible with most electronic components.

23 ERES EHI 100

Cleaning solution for electronic equipment, such as computers and circuit boards. Non-conductive and non-corrosive, safe for use on sensitive electronics. Available in aerosol cans or bulk containers. Compatible with most electronic components.

24 START Cold Environment Lacquered SHP

Lacquer used to protect and insulate electrical components, such as circuit boards and connectors, in cold environments. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

25 WINTO 3HP - Dry Graphite Conductive Sealant

Sealant used to seal gaps and openings in electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

26 Super 230 - Zinc Lead Detection Spray

Spray used to detect zinc and lead contamination in electrical components, such as circuit boards and connectors. Provides a quick and easy way to identify contamination and prevent damage. Available in aerosol cans or bulk containers. Compatible with most electrical components.

27 Transformer Oil Heavy Thinner

Thinner used to reduce the viscosity of transformer oil, making it easier to work with. Helps to improve the flow of oil and reduce the risk of clogging. Available in aerosol cans or bulk containers. Compatible with most transformer oil types.

28 DIELECTRIC FLUSH COATING

STANVAC FS12 - Thermal, Calcium, Expansion.

Fire-resistant coating applied to steel surfaces to delay heat transfer during a fire. Intumescent coating expands when heated, forming an insulating char layer. Cementitious coating is sprayed on in thicker layers. Fire rating is measured in hours (e.g., 60 minutes, 120 minutes).

29 FIRES Fast 3M - Heavy Duty Penetrant

Penetrant used to detect cracks and other defects in electrical components, such as circuit boards and connectors. Provides a high level of sensitivity and accuracy. Available in aerosol cans or bulk containers. Compatible with most electrical components.

30 ERES Kroppen 10L - Self Fusing Tape

Self-fusing tape used to insulate and protect electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in various sizes and lengths. Compatible with most electrical components.

12 DIELECTRIC ANTI-CORROSION

31 1000 TST + TST SHP - Anti-Corrosion System

Anti-corrosion system used to protect electrical components, such as circuit boards and connectors, from corrosion and damage. Provides a high level of protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

32 1000 Electrolyte TST - Varnish Insulation

Varnish used to insulate and protect electrical components, such as coils and transformers. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.

33 TRANSFORMER & HIGH VOLTAGE INSULATION

STANVAC FS12 - Thermal, Calcium, Expansion.

Fire-resistant coating applied to steel surfaces to delay heat transfer during a fire. Intumescent coating expands when heated, forming an insulating char layer. Cementitious coating is sprayed on in thicker layers. Fire rating is measured in hours (e.g., 60 minutes, 120 minutes).

34 HIGH VOLTAGE - High Voltage Insulation Tape

High voltage insulation tape used to protect electrical components, such as circuit boards and connectors, from high voltage damage. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in various sizes and lengths. Compatible with most electrical components.

35 ERES Kroppen 10L - Self Fusing Tape

Self-fusing tape used to insulate and protect electrical components, such as circuit boards and connectors. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in various sizes and lengths. Compatible with most electrical components.

36 TERM Electrolyte TST - Varnish Insulation

Varnish used to insulate and protect electrical components, such as coils and transformers. Provides a high level of electrical insulation and protection against moisture and corrosion. Available in aerosol cans or bulk containers. Compatible with most electrical components.
