

~20,000

INDIANS DIE IN ELECTRICAL ACCIDENTS EVERY YEAR
ONE EVERY 26 MINUTES

THE ELECTRICAL ACCIDENT CHAIN

Spreads as **FIRE**. Kills as **SHOCK**. Ends in **HUMAN DEATH**.

ONLY ONE COMPANY IN THE WORLD PROTECTS EVERY LINK – 

1 FIRE

~7,400 DEAD A YEAR

electrical faults – the No.1 cause of fire

Born at a fault – then it climbs: trench → panel → tray → next room. Five doors. Close every one.

- 1 The first fuel – panel internal wiring → **EC 7034** · translucent · flexible · anti-rodent · 120 min · CBRI
- 2 The highway – every cable run & tray → **EC 43 Survival** · circuit alive 240 min · IEC 60331-21
- 3 The panel itself – body & gland openings → **FBS 73 + DC 52** · gap seal + fire paint
- 4 Below the panel – floor cutouts to the cable trench → **FM 71 + FB 250** · 2-hour firestop
- 5 Above the panel – roof & wall tray entries, every room crossing → **FM 71 + FB 250** · 2-hour firestop

2 SHOCK

~12,500 DEAD A YEAR

death by electrocution – one touch is enough

Insulation fails → live metal → one touch → current through the heart.

Under his feet – panel-room floor → **1311 Insulkote** · IS 15652 dielectric flooring · **10-YEAR WARRANTY**

On the panel body – leakage current → **2080 Electrohyb** · SHP dielectric coat · fast-dry

In the earth – the path that saves him → **RUSTEX + 7007** · cold galvanizing · earth alive for years

MONEY CAN BUY EVERYTHING – **EXCEPT A LIFE. EXCEPT YOUR NAME.**

One fatality is a criminal negligence case against the occupier – not the electrician.

ELECTRICITY IS EVERYWHERE IN YOUR PLANT – **SO IS THE DANGER.**

Fire and shock can kill anywhere. It does not matter where. So the whole plant must be protected – against both, together, not one by one – and as fast as possible.

Order complete fire + shock protection today. Only one company in the world can deliver it. **Stanvac – the best in the world at both.**
